8 November 2016 Election Day!

## Question

Have you been following the presidential election?

## Question

What is an election?

## Question

## What is the difference between a war and an election?

## Question

A prime goal of democracy is to replace wars with elections by replacing bullets with ballots.

## The Ballot

An election must feature a ballot. We will assume the ballot is the same for each voter; further, one person/one ballot.

## The Ballot

## The structure of the ballot determines

 your voice in an election.
## The Ballot

## During the Stalin era of the Soviet Union, a ballot looked like this:

## The Ballot

## During the Stalin era of the Soviet Union, a ballot looked like this:

District Commisar<br>Vote for one:<br>Alesander Kolnovic

## The Ballot

## A two-option ballot looks like this:

| Vote for One |
| :--- |
| $\square$ Option A |
| $\square$ Option B |

## The Ballot

After the ballots are cast, the next step is to determine who wins!

## The Ballot

After the ballots are cast, the next step is to determine who wins!
> Majority Rule

## The Ballot

After the ballots are cast, the next step is to determine who wins!
> Majority Rule
> Unanimous

## The Ballot

After the ballots are cast, the next step is to determine who wins!
> Majority Rule
> Unanimous
$>$ Super majority

## The Single Vote Ballot

A multi-option ballot looks like this:

| Vote for One |
| :--- |
| $\square$ |
| Option A |
| $\square$ Option B |
| $\square$ Option C |
| $\square$ Option D |
| $\square$ Option E |

## The Single Vote Ballot

A multi-option ballot looks like this:

| Vote for One |
| :--- |
| $\square$ |
| Option A |
| $\square$ |
| Option B |
| $\square$ |
| Option C |
| $\square$ |
| Option D |
| Option E |

Who wins?

## The Single Vote Ballot

A multi-option ballot looks like this:

| Vote for One |  |
| :--- | :--- |
| $\square$ | Option A |
| $\square$ | Option B |
| $\square$ | Option C |
| $\square$ | Option D |
| $\square$ | Option E |

Who wins? Plurality

## The Single Vote Ballot

A multi-option ballot looks like this:
Vote for One
$\square$ Option A
$\square$ Option B
$\square$ Option C
$\square$ Option D
$\square$ Option E

Who wins? Plurality
Majority else top 2 run-off

## The Single Vote Ballot

A multi-option ballot looks like this:

| Vote for One |  |
| :--- | :--- |
| $\square$ Option A | Notice how restricted |
| $\square$ Option B | the voter's voice is. |
| $\square$ Option C |  |
| $\square$ Option D |  |
| $\square$ Option E |  |

Who wins? Plurality
Majority else top 2 run-off

## The Single Vote Ballot

A multi-option ballot looks like this:

| Vote for One |  |
| :--- | :--- |
| $\square$ Option A | Notice how restricted |
| $\square$ Option B | the voter's voice is. |
| $\square$ Option C | Many voters will vote |
| $\square$ Option D | strategically rather |
| $\square$ Option E | than honestly. |

Who wins? Plurality
Majority else top 2 run-off

## Approval Voting

A multi-option ballot looks like this:
Approval List
Vote for all options
$\square$ Option A
$\square$ Option B
$\square$ Option C
$\square$ Option D
$\square$ Option E

## Approval Voting

A multi-option ballot looks like this:

| Approval List |  |
| :--- | :--- |
| $\square$ Option A | Vote for all options |
| that you approve. |  |
| Option B |  |
| Option C |  |
| Option D |  |
| Option E |  |

Who wins?
$>$ Plurality
$>$ Top 2 run-off if no majority
$>$ Greatest majority

## Approval Voting

A comparison. Here, $N=100$.

Consider 100 voters in a three-way election:
$>26$ first choice $A$ but approve of $B$.
> 25 first choice A but approve neither B nor C.
> 15 first choice B but approve neither A nor C .
$>18$ first choice $C$ but approve of $B$.
$>16$ first choice C but approve neither A nor B .

## Approval Voting

A comparison. Here, $N=100$.

Consider 100 voters in a three-way election:
$>26$ first choice A
$>25$ first choice A
$>15$ first choice B
$>18$ first choice C
$>16$ first choice C

In a Vote for One election, A wins by majority rule.

## Approval Voting

A comparison. Here, $N=100$.

| 26 | 25 | 15 | 18 | 16 |
| :---: | :---: | :---: | :---: | :---: |
| $\bullet$ A | $\bullet$ A | $\circ$ A | $\circ$ A | $\circ$ A |
| $\bullet$ B | $\circ$ B | $\bullet$ B | $\bullet$ B | $\circ$ B |
| $\circ \mathrm{C}$ | $\circ \mathrm{C}$ | $\circ \mathrm{C}$ | $\bullet \mathrm{C}$ | $\bullet \mathrm{C}$ |

vs. Vote for One option.

| 51 | 15 | 34 |
| :---: | :---: | :---: |
| - A | - A | - A |
| - B | - B | - B |
| $\bigcirc \mathrm{C}$ | - C | - C |

## Approval Voting

A comparison. Here, $N=100$.

| 26 | 25 | 15 | 18 | 16 |
| :---: | :---: | :---: | :---: | :---: |
| - A | - A | $\bigcirc$ A | $\bigcirc \mathrm{A}$ | - A |
| - B | - B | - B | - B | - B |
|  |  |  | - C | - C |

A 51
B 59
C 34
B wins.
vs. Vote for One option.

| 51 | 15 | 34 |
| :---: | :---: | :---: |
| $\bullet$ | A | $\circ$ |
|  | A | $\circ$ |
|  | A |  |
| $\circ$ | B | $\bullet$ |
| $\circ$ | C | $\circ$ |

A 51
B 15
C 34
A wins.

## Which Ballot?

## Which Ballot?

Vote for One Party
Hillary Clinton
and Tim Kaine
Democratic
Gloria Estela La Riva
and Dennis J. Banks
Peace and Freedom
Donald J. Trump
and Michael R. Pence
Republican, American Independent
Gary Johnson
and Bill Weld
Libertarian
Jill Stein
and Ajamu Baraka
Green

## Vote for all Approved

Hillary Clinton and Tim Kaine
Democratic
$\square$ Gloria Estela La Riva and Dennis J. Banks
Peace and Freedom
$\square$ Donald J. Trump
and Michael R. Pence
Republican, American Independent
$\square$ Gary Johnson
and Bill Weld
Libertarian
$\square$ Jill Stein
and Ajamu Baraka
Green

## Ranked Choice Voting

In a ranked choice ballot the voter ranks some or all of the candidates.

In a top three system, you rank your top 3 choices as 1,2 , or 3 .

In a full ranked system, if the ballot displays five choices, then you rank those choices 1 though 5.

## The Ballot

In the 2010 Senate Race in California, consider these two ballots.

## Vote for one:

o Duane Roberts (G)

- Marsha Feinland (PF)
o Gail Lightfoot (L)
- Barbara Boxer (D)
o Carly Fiorina (R)
o Edward Noonan (AI)

G = Green
PF = Peace \& Freedom
L = Libertarian
AI = American Independent

## The Ballot

In the 2010 Senate Race in California, consider these two ballots.

## Vote for one:

- Duane Roberts (G)
o Marsha Feinland (PF)
- Gail Lightfoot (L)
o Barbara Boxer (D)
o Carly Fiorina (R)
o Edward Noonan (AI)

G = Green
PF = Peace \& Freedom
L = Libertarian
AI = American Independent

Rank each candidate once, 1 - 6: RANK 1223456
Duane Roberts o o o o o o
Marsha Feinland oo o o o o
Gail Lightfoot o o o o o o

Marsha Feinland o o o o o
Gail Lightfoot ○ o o o o
Barbara Boxer o o o o o
Carly Fiorina o o o o o
Edward Noonan o o o o o o

## A Background Story

XYZ Company employs 55 people. Health insurance legislation requires XYZ to provide insurance to its employees. XYZ receives bids from five companies: A, B, C, D and E. XYZ must adopt one of these plans which then applies to all its employees. All five plans are the same cost to XYZ; however, the benefits package differs between plans. Previously the CEO of XYZ sent a letter to its employees that XYZ would allow them to vote among the competing bids and that XYZ would honor their choice. XYZ holds an election and the employees vote their preferences.

## The Ballots:

55 voters

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |
| Fourth | C | C | D | B | C | B |
| Fifth | B | A | A | A | A | A |

## The Ballots:

55 voters

## Majority Criterion

The Majority Criterion is considered to be a basic rule of fairness:

## Majority Criterion

The Majority Criterion is considered to be a basic rule of fairness:

If a candidate gets a majority of votes, then that candidate should be declared the winner.

## The Problem

If no candidate gets a majority of the votes, then is there such a thing as the "will of the people?"

## The Problem

If no candidate gets a majority of the votes, then is there such a thing as the "will of the people?"

In general, can individual preferences be translated into a "group choice?"

## Decision Mechanisms

## Decision Mechanisms

- Plurality

## Plurality

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |
| Fourth | C | C | D | B | C | B |
| Fifth | B | A | A | A | A | A |

The candidate with the most first place votes wins.

## Plurality

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |

The candidate with the most first place votes wins.

## Plurality

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |

The candidate with the most first place votes wins.

A wins.

## Plurality

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |
| Fourth | C | C | D | B | C | B |
| Fifth | B | A | A | A | A | A |

$N=55$
Plurality is the most common method in US elections.

Main drawback: the least desirable candidate may win. Here, the plurality winner A would lose 37-18 in a one-on-one contest with any other candidate.

## Decision Mechanisms

- Plurality
- Top two run-off

## Top Two Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |

The two<br>candidates with the most first place votes are A and B .

## Top Two Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | B |  |  |  |  |  |  |  |  |
|  |  |  | B |  | B |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |
|  | B | A | A | A | A | A |  |  |  |  |
| $\mathrm{N}=55,28$ needed to win. |  |  |  |  |  |  |  |  |  |  |

Run-Off: A vs. B.
A: 18 votes.
B: 37 votes.

## Top Two Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | B |  |  |  |  |  |  |  |  |
|  |  |  | B |  | B |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |
|  | B | A | A | A | A | A |  |  |  |  |
| $\mathrm{N}=55,28$ needed to win. |  |  |  |  |  |  |  |  |  |  |

Run-Off: A vs. B.

A: 18 votes.
B: 37 votes.
B wins.

## Comedy Central

The Tea Party in Arizona is holding an endorsement convention. The nominees are Carly Fiorina, Ted Cruz, and Kevin McCarthy. There are 100 delegates who cast rank ordered ballots.

## Comedy Central

| 27 | 10 | 16 | 15 | 32 |
| :--- | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz | McCarthy |
| McCarthy | Cruz | Fiorina | McCarthy | Cruz |
| Cruz | McCarthy | McCarthy | Fiorina | Fiorina |

## Comedy Central

| 27 | 10 | 16 | 15 | 32 |
| :--- | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz | McCarthy |
| McCarthy <br> Cruz | Cruz <br> McCarthy | Fiorina | McCarthy | Mcarthy |
| Cruz |  |  |  |  |
| Fiorina | Fiorina |  |  |  |

## Comedy Central

| 27 | 10 | 16 | 15 | 32 |
| :--- | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz | McCarthy |
| McCarthy <br> Cruz | Cruz | Fiorina | McCarthy | Cruz |
| McCarthy | McCarthy | Fiorina | Fiorina |  |

Fiorina (37) and McCarthy (32) are the top two.

## Comedy Central

| 27 | 10 | 16 | 15 | 32 |
| :--- | :--- | :--- | :--- | :---: |
| Fiorina | Fiorina |  |  | McCarthy |
| McCarthy | McCarthy | Fiorina <br> McCarthy | McCarthy <br> Fiorina | Fiorina |

Fiorina (37) and McCarthy (32) are the top two.

## Comedy Central

| 27 | 10 | 16 | 15 | 32 |
| :--- | :--- | :--- | :--- | :---: |
| Fiorina | Fiorina |  |  | McCarthy |
| McCarthy | McCarthy | Fiorina <br> McCarthy | McCarthy <br> Fiorina | Fiorina |

Fiorina (37) and McCarthy (32) are the top two.
Fiorina wins 53-47.

## Comedy Central

| 27 | 10 | 16 | 15 | 32 |
| :--- | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz | McCarthy |
| McCarthy | Cruz | Fiorina | McCarthy | Cruz |
| Cruz | McCarthy | McCarthy | Fiorina | Fiorina |

Now suppose that in the morning before the election, Carly Fiorina met with some of the delegates and gave an impressive performance to the McCarthy block and that two of the McCarthy supporters decided to switch to Fiorina.

## Comedy Central

| 27 | 10 | 16 | 15 | 3230 |
| :--- | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz | McCarthy |
| McCarthy <br> Cruz | Cruz <br> McCarthy | Fiorina | McCarthy | Mcarthy |
| Cruz |  |  |  |  |
| Fiorina | Fiorina |  |  |  |

Now suppose that in the morning before the election, Carly Fiorina met with some of the delegates and gave an impressive performance to the McCarthy block and that two of the McCarthy supporters decided to switch to Fiorina.

## Comedy Central

| 27 29 | 10 | 16 | 15 | $32 \quad 30$ |
| :--- | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz | McCarthy |
| McCarthy <br> Cruz | Cruz <br> McCarthy | Fiorina | McCarthy | Mcarthy |
| Cruz |  |  |  |  |
| Fiorina | Fiorina |  |  |  |

Now the run-off is between Fiorina and Cruz (39-31-30)!

## Comedy Central

| $27 \quad 29$ | 10 | 16 | 15 | $32 \quad 30$ |
| :---: | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz |  |
| Cruz | Cruz | Fiorina |  | Cruz <br> Fiorina |

Now the run-off is between Fiorina and Cruz (39-31-30)!

In the Fiorina vs. Cruz run-off, Cruz wins 61-39.

## Comedy Central

| $27 \quad 29$ | 10 | 16 | 15 | $32 \quad 30$ |
| :--- | :--- | :--- | :--- | :--- |
| Fiorina | Fiorina | Cruz | Cruz |  |
| Cruz | Cruz | Fiorina | Fiorina | Cruz <br> Fiorina |

Now the run-off is between Fiorina and Cruz (39-31-30)!

In the Fiorina vs. Cruz run-off, Cruz wins 61-39.
Increased support for Fiorina transforms her from a winner into a loser!

## Decision Mechanisms

- Plurality
- Top two run-off
- Sequential elimination run-off

## Sequential Elimination Run-Off

A top two run-off is a simplified elimination method. Along with plurality it is the most common method used in US political elections.

Some localities are replacing the top two run-off method with a ranked order system. For example, rank your top three choices.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 |  | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E |  | E |
| Second | D | E | B | C | E |  | C |
| Third | E | D | E | E | D |  | D |
| Fourth | C | C | D | B | C |  | B |
| Fifth | B | A | A | A |  |  | A |

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |

Rank your top three choices.

Rank your top three choices

|  | Rank |  |  |
| :---: | :---: | :---: | :---: |
| Option | 1 | 2 | 3 |
| A | 0 | 0 | 0 |
| B | 0 | 0 | 0 |
| C | 0 | 0 | 0 |
| D | 0 | 0 | 0 |
| E | O | 0 | 0 |

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 |  | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |

Rank your top three choices.

Rank your top three choices

|  | Rank |  |  |
| :---: | :---: | :---: | :---: |
| Option | 1 | 2 | 3 |
| A | 0 | $\circ$ | 0 |
| B | 0 | $\circ$ | 0 |
| C | 0 | 0 | 0 |
| D | 0 | 0 | 0 |
| E | $\bullet$ | 0 | 0 |

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |

Rank your top three choices.
Eliminate the "least fit" candidate and then recount the votes.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |

Rank your top three choices.
Eliminate the "least fit" candidate and then recount the votes.

The candidate with the least first place votes is E ; hence eliminate E.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| First | A | B | C | D |  |  |
| Second | D |  | B | C | B | C |
| Third |  | D |  |  | D | D |

$\mathrm{N}=55,28$ needed to win.
Rank your top three choices.
Eliminate the "least fit" candidate and then recount the votes.

The candidate with the least first place votes is E; hence eliminate E.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 |  | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C |  |  | B | C |
| Second | D | D | B |  |  | D | D |
| Third |  |  |  |  |  |  |  |

Rank your top three choices.
Eliminate the "least fit" candidate and then recount the votes.

The candidate with the least first place votes is E; hence eliminate E.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | B | C |
| Second | D | D | B | C | D | D |

Rank your top three choices.
Eliminate the "least fit" candidate and then recount the votes.

The candidate with the least first place votes is E ; hence eliminate E.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | B | C |
| Second | D | D | B | C | D | D |

Rank your top three choices.
Eliminate the "least fit" candidate and then recount the votes.

The candidate with the least first place votes is E ; hence eliminate E.

Still no majority. Eliminate D.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C |  | B | C |
| Second |  |  |  |  |  |  |$|$| B | C |
| :--- | :--- |

Rank your top three choices.
Eliminate the "least fit" candidate and then recount the votes.

The candidate with the least first place votes is E ; hence eliminate E.

Still no majority. Eliminate D.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 |  | 4 | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| D |  | O | $\bigcirc$ | $\bigcirc$ |  |
| E |  | $\bigcirc$ | $\bigcirc$ | - |  |

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 | 2 |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |  |
| Second | D | E | B | C | B | C |  |
| Third | E | D | E | E | D | D |  |
| Fourth | C | C | D | B | C | B |  |
| Fifth | B | A | A | A | A | A |  |
| N $=55,28$ needed to win. |  |  |  |  |  |  |  |

Rank the candidates

|  | Rank |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Option | 1 | 2 | 3 | 4 | 5 |
| A | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bullet$ |
| B | $\bigcirc$ | - | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
| C |  | O | O | - |  |
| D |  | - | - | $\bigcirc$ | - |
| E |  | 0 | $\bigcirc$ | $\bigcirc$ |  |

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 |  | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E |  | E |
| Second | D | E | B | C | B |  | C |
| Third | E | D | E | E | D |  | D |
| Fourth | C | C | D | B | C |  | B |
| Fifth | B | A | A | A |  |  |  |

Eliminate the "least fit" candidate and then recount the votes.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 |  | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E |  | E |
| Second | D | E | B | C | B |  | C |
| Third | E | D | E | E | D |  | D |
| Fourth | C | C | D | B | C |  | B |
| Fifth | B | A | A | A | A |  |  |

Eliminate the "least fit" candidate and then recount the votes.

The candidate with the least first place votes is E ; hence eliminate E.

## Sequential Elimination Run-Off

|  | 18 | 12 | 10 | 9 | 4 |  | 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D |  |  |  |

$\mathrm{N}=55,28$ needed to win.
D: 27 votes
E: 28 votes
Eliminate A.
Eliminate B.
Eliminate C.
E wins!
Coombs: Eliminate the "least desirable" candidate and then recount the votes.

## Sequential Elimination Run-Off

The full sequential elimination method is used by the International Olympic Committee to decide the site of the Olympic Games.

In local political elections, "least fit" sequential elimination is more commonly known as Instant Runoff Voting (IRV).

## Decision Mechanisms

- Plurality
- Top two run-off
- Sequential elimination run-off
- Borda Count

## Borda Count

| Third | C | D | B |
| Fourth | D | A | A |

## Borda Count

Problem: The Borda Count can violate the Majority Criterion of Fairness.

|  | 6 | 2 | 3 |
| :--- | :---: | :---: | :---: |
| First | A | B | C |
| Second | B | C | D |
| Third | C | D | B |
| Fourth | D | A | A |

Borda Points:
A: 29
B: 32
C: 30
D: 19
B wins!

## Comedy Central

The teacher offers to buy the class ice cream if the students will agree on one flavor. The choices are strawberry, chocolate, and vanilla.

## Comedy Central

The teacher offers to buy the class ice cream if the students will agree on one flavor. The choices are strawberry, chocolate, and vanilla.
A rank-order ballot is taken and the class decides on chocolate.

## Comedy Central

The teacher offers to buy the class ice cream if the students will agree on one flavor. The choices are strawberry, chocolate, and vanilla.
A rank-order ballot is taken and the class decides on chocolate. The teacher goes out for the ice cream and brings back vanilla.

## Comedy Central

The teacher offers to buy the class ice cream if the students will agree on one flavor. The choices are strawberry, chocolate, and vanilla.
A rank-order ballot is taken and the class decides on chocolate. The teacher goes out for the ice cream and brings back vanilla. The students ask, Why vanilla? Were they out of chocolate?

## Comedy Central

The teacher offers to buy the class ice cream if the students will agree on one flavor. The choices are strawberry, chocolate, and vanilla.
A rank-order ballot is taken and the class decides on chocolate.
The teacher goes out for the ice cream and brings back vanilla.
The students ask, Why vanilla? Were they out of chocolate?
The teacher says, Well, no. They had chocolate. I got vanilla because they were out of strawberry.

## Comedy Central

The teacher offers to buy the class ice cream if the students will agree on one flavor. The choices are strawberry, chocolate, and vanilla.
A rank-order ballot is taken and the class decides on chocolate.
The teacher goes out for the ice cream and brings back vanilla.
The students ask, Why vanilla? Were they out of chocolate?
The teacher says, Well, no. They had chocolate. I got vanilla because they were out of strawberry.

How could this happen?

## Comedy Central

| 4 | 2 | 5 |
| :---: | :---: | :---: |
| Strawberry <br> Vanilla <br> Chocolate | Vanilla <br> Chocolate <br> Strawberry | Chocolate <br> Strawberry <br> Vanilla |

## Comedy Central

| 4 | 2 | 5 |
| :---: | :---: | :---: |
| Strawberry <br> Vanilla <br> Chocolate | Vanilla <br> Chocolate <br> Strawberry | Chocolate <br> Strawberry <br> Vanilla |

Plurality, top two run-off, either form of elimination, and the Borda Count all produce Chocolate as the winner.

## Comedy Central

| 4 | 2 | 5 |
| :---: | :---: | :---: |
| Strawberry <br> Vanilla <br> Chocolate | Vanilla <br> Chocolate <br> Strawberry | Chocolate <br> Strawberry <br> Vanilla |

But since they were out of strawberry, then the teacher eliminated strawberry from the count.

## Comedy Central

| 4 | 2 | 5 |
| :---: | :---: | :---: |
| Vanilla <br> Chocolate | Vanilla <br> Chocolate | Chocolate <br> Vanilla |

But since they were out of strawberry, then the teacher eliminated strawberry from the count.

So, Vanilla wins 6 - 5 !

- Majority Rule
- Condorcet Rule
- An increase in support does not damage one's chance of winning.

## Fairness Axioms

- Individual Sovereignty (free ballot)
- Majority Rule
- Condorcet Rule
- An increase in support does not damage one's chance of winning.
- If a losing candidate drops out and voter preferences are constant, then the election result is not changed.

## Arrow's Theorem

There is no voting system that can satisfy all requirements in all cases.

## Condorcet Paradox

A simple way to illustrate the difficulty is to consider the following example.

Voter 1: A, B, C
Voter 2: B, C, A
Voter 3: C, A, B

## Condorcet Paradox

> consider the following example.
> Voter 1: A, B, C
> Voter 2: B, C, A
> Voter 3: C, A, B
> In pairwise voting,
> A beats B, 2 to 1 ;
> B beats $\mathrm{C}, 2$ to 1 ;
> yet, $\quad$ C beats $\mathrm{A}, 2$ to 1 .

A simple way to illustrate the difficulty is to

Pairwise voting may not be transitive.

## Points to Ponder

Even though "perfection" isn't possible, improvement may be possible.

## Approval Voting

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |
| Fourth | C | C | D | B | C | B |
| Fifth | B | A | A | A | A | A |

Assume that each voter would approve of their top two choices.

## Approval Voting

|  | A | B | C | D | E |
| :--- | :---: | :---: | :---: | :---: | :---: |
| First | 18 | 12 | 10 | 9 | 6 |
| Second | 0 | 14 | 11 | 18 | 12 |
| Total | 18 | 26 | 21 | 27 | 18 |

Still no one gets a majority ( $\mathrm{N}=55$; 28 needed to win). The top-two runoff would run off B ( 26 votes) vs. D ( 29 votes). D wins!

## Approval Voting

|  | 18 | 12 | 10 | 9 | 4 | 2 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| First | A | B | C | D | E | E |
| Second | D | E | B | C | B | C |
| Third | E | D | E | E | D | D |
| Fourth | C | C | D | B | C | B |
| Fifth | B | A | A | A | A | A |

Assume that each voter would approve of their top three choices.

## Approval Voting

|  | A | B | C | D | E |
| :--- | :---: | :---: | :---: | :---: | :---: |
| First | 18 | 12 | 10 | 9 | 6 |
| Second | 0 | 14 | 11 | 18 | 12 |
| Third | 0 | 0 | 0 | 18 | 37 |
| Total | 18 | 26 | 21 | 45 | 55 |

Only D and E get a majority; E is "unanimously approved". E wins!

## The Ballot

## Structure

- List Only
$>$ Vote for One
> Vote for Approved
- List and Rank

$>$ Partial<br>$>$ Full

Decision

- List Only
> Plurality
$>$ Run-Off
- List and Rank
$>$ IRV
$>$ Coombs
$>$ Borda
> Condorcet
> Approval

## Comedy Central

Recently in Egypt a father with 17 camels willed his estate to his sons as follows: son \#1 gets $1 / 2$; son \#2 gets $1 / 3$; son \#3 gets $1 / 9$.

## Comedy Central

Recently in Egypt a father with 17 camels willed his estate to his sons as follows: son \#1 gets $1 / 2$; son \#2 gets $1 / 3$; son \#3 gets $1 / 9$.

## Comedy Central

Recently in Egypt a father with 17 camels willed his estate to his sons as follows: son \#1 gets $1 / 2$; son \#2 gets $1 / 3$; son \#3 gets $1 / 9$.

## Comedy Central

Recently in Egypt a father with 17 camels willed his estate to his sons as follows: son \#1 gets $1 / 2$; son \#2 gets $1 / 3$; son \#3 gets 1/9.

The father dies. The son
$1 / 3 \times 17=5^{2 / 3}$
$1 / 9 \times 17=18 / 9$
A wise man notes the dilemma of the sons and contributes his camel, yielding 18 camels to be distributed.

## Comedy Central

Recently in Egypt a father with 17 camels willed his estate to his sons as follows: son \#1 gets $1 / 2$; son \#2 gets $1 / 3$; son \#3 gets $1 / 9$.

The father dies. The sons are in a quandary

$$
\begin{aligned}
& 1 / 2 \times 17=81 / 2 \\
& 1 / 3 \times 17=5 / 2 / 3 \\
& 1 / 9 \times 17=18 / 9
\end{aligned} \quad\left\{\begin{array}{l}
1 / 2 \times 18=9 \\
1 / 3 \times 18=6 \\
1 / 9 \times 18=2
\end{array}\right.
$$

Each son gets more than his inheritance.

## Comedy Central

Recently in Egypt a father with 17 camels willed his estate to his sons as follows: son \#1 gets $1 / 2$; son \#2 gets $1 / 3$; son \#3 gets 1/9.

The father dies. The sons are in a quandary,

$$
\begin{aligned}
& 1 / 2 \times 17=81 / 2 \\
& 1 / 3 \times 17=5 / 2 / 3 \\
& 1 / 9 \times 17=18 / 9
\end{aligned} \quad\left\{\begin{array}{l}
1 / 2 \times 18=9 \\
1 / 3 \times 18=6 \\
1 / 9 \times 18=2
\end{array}\right.
$$

Each son gets more than his inheritance.
And the wise man rides off on the left over camel.
